

Mechanical Breaching (LE)

This one day course is for sworn law enforcement officers that are looking to utilize mechanical breaching as an emergency entry method. Mechanical breaching can be utilized on tactical operations as well as active shooter emergencies. This course is not just for special operations officers assigned to a team. Students will be required to perform field exercises under high stress as well as focusing on classroom instruction. The course will cover the following topics:

- Tools for mechanical breaching
- Creating a breaching plan
- Carry and implementation of breaching tools
- Defeating different locking devices

Graduates of this course will be capable of analyzing an entry point, selecting the appropriate tool and implementing a mechanical breach. Graduates of this course can work together as a breaching team or as individuals they can supplement an active shooter response.
